

MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 69 (1993)

- Adherence, aging, integrins, polymorphonuclear cells, respiratory burst, 53
- Age pathology, aging, stress, neurohumoral regulation, 93
- Age-related changes, rat serum, heparin-binding growth factors, DNA synthesis, BALB/c 3T3 cells, 179
- Age-related decrease in PGI₂ production, human endothelial cells, in vitro ageing, 167
- Ageing, interleukin-7, bone marrow, cytokine, 109
- Ageing, protein synthesis, elongation factors, phorbol esters, 193
- Aging, adherence, integrins, polymorphonuclear cells, respiratory burst, 53
- Aging, CD45RA, CD45RO, influenza virus, influenza split-virus vaccine, 79
- Aging, Gompertz function, mortality, epidemiology, 33
- Aging, nerve growth factor receptor, cerebellar cortex, choline afoscerate, immunohistochemistry, 119
- Aging, platelet, protein kinase C, 129
- Aging, stress, neurohumoral regulation, age pathology, 93
- Aging, TNF- α , macrophage, phagocyte, surface antigen, 207
- BALB/c 3T3 cells, age-related changes, rat serum, heparin-binding growth factors, DNA synthesis, 179
- Biolimit, human, life-span, biomarker, biopotential, 65
- Biomarker, human, life-span, biolimit, biopotential, 65
- Biopotential, human, life-span, biomarker, biolimit, 65
- Body composition, exercise, food intake, 161
- Bone marrow, interleukin-7, ageing, cytokine, 109
- Brain, cholecystokinin, intestine, gene, RNA, mRNA, injury, chemotherapy, 219
- CD45RA, CD45RO, aging, influenza virus, influenza split-virus vaccine, 79
- CD45RO, CD45RA, aging, influenza virus, influenza split-virus vaccine, 79
- Cerebellar cortex, nerve growth factor receptor, aging, choline afoscerate, immunohistochemistry, 119
- Chemotherapy, cholecystokinin, brain, intestine, gene, RNA, mRNA, injury, 219
- Cholecystokinin, brain, intestine, gene, RNA, mRNA, injury, chemotherapy, 219
- Choline afoscerate, nerve growth factor receptor, cerebellar cortex, aging, immunohistochemistry, 119
- Chromosomal loss, in vitro aging, human diploid fibroblast, SV40 large T antigen, immortalization, 149
- Cytokine, interleukin-7, ageing, bone marrow, 109
- Disease, mortality analyses, gompertz function, weibull function, failure, survival, longitudinal analysis, 1
- DNA synthesis, age-related changes, rat serum, heparin-binding growth factors, BALB/c 3T3 cells, 179
- Elongation factors, ageing, protein synthesis, phorbol esters, 193
- Epidemiology, Gompertz function, mortality, aging, 33
- Exercise, body composition, food intake, 161
- Failure, mortality analyses, gompertz function, weibull function, disease, survival, longitudinal analysis, 1
- Fluidity, superoxide radicals, lipid peroxidation, proteolysis, spawning salmon, 137
- Food intake, body composition, exercise, 161
- Gene, cholecystokinin, brain, intestine, RNA, mRNA, injury, chemotherapy, 219

- Gompertz function, mortality analyses, weibull function, disease, failure, survival, longitudinal analysis, 1
- Gompertz function, mortality, aging, epidemiology, 33
- Guinea pig, lactate dehydrogenase, isozymes, ontogeny, interactions, 37
- Heparin-binding growth factors, age-related changes, rat serum, DNA synthesis, BALB/c 3T3 cells, 179
- Human diploid fibroblast, in vitro aging, SV40 large T antigen, immortalization, chromosomal loss, 149
- Human endothelial cells, in vitro ageing, age-related decrease in PGI₂ production, 167
- Human, life-span, biomarker, biolimit, biopotential, 65
- Immortalization, in vitro aging, human diploid fibroblast, SV40 large T antigen, chromosomal loss, 149
- Immunohistochemistry, nerve growth factor receptor, cerebellar cortex, aging, choline afoscerate, 119
- In vitro ageing, human endothelial cells, age-related decrease in PGI₂ production, 167
- In vitro aging, human diploid fibroblast, SV40 large T antigen, immortalization, chromosomal loss, 149
- Influenza split-virus vaccine, CD45RA, CD45RO, aging, influenza virus, 79
- Influenza virus, CD45RA, CD45RO, aging, influenza split-virus vaccine, 79
- Injury, cholecystokinin, brain, intestine, gene, RNA, mRNA, chemotherapy, 219
- Integrins, adherence, aging, polymorphonuclear cells, respiratory burst, 53
- Interactions, lactate dehydrogenase, isozymes, ontogeny, guinea pig, 37
- Interleukin-7, ageing, bone marrow, cytokine, 109
- Intestine, cholecystokinin, brain, gene, RNA, mRNA, injury, chemotherapy, 219
- Isozymes, lactate dehydrogenase, ontogeny, interactions, guinea pig, 37
- Lactate dehydrogenase, isozymes, ontogeny, interactions, guinea pig, 37
- Life-span, human, biomarker, biolimit, biopotential, 65
- Lipid peroxidation, superoxide radicals, fluidity, proteolysis, spawning salmon, 137
- Longitudinal analysis, mortality analyses, gompertz function, weibull function, disease, failure, survival, 1
- Macrophage, TNF- α , phagocyte, surface antigen, aging, 207
- Mortality analyses, gompertz function, weibull function, disease, failure, survival, longitudinal analysis, 1
- Mortality, Gompertz function, aging, epidemiology, 33
- mRNA, cholecystokinin, brain, intestine, gene, RNA, injury, chemotherapy, 219
- Nerve growth factor receptor, cerebellar cortex, aging, choline afoscerate, immunohistochemistry, 119
- Neurohumoral regulation, aging, stress, age pathology, 93
- Ontogeny, lactate dehydrogenase, isozymes, interactions, guinea pig, 37
- Phagocyte, TNF- α , macrophage, surface antigen, aging, 207
- Phorbol esters, ageing, protein synthesis, elongation factors, 193
- Platelet, protein kinase C, aging, 129
- Polymorphonuclear cells, adherence, aging, integrins, respiratory burst, 53
- Protein kinase C, platelet, aging, 129
- Protein synthesis, ageing, elongation factors, phorbol esters, 193
- Proteolysis, superoxide radicals, lipid peroxidation, fluidity, spawning salmon, 137
- Rat serum, age-related changes, heparin-binding growth factors, DNA synthesis, BALB/c 3T3 cells, 179
- Respiratory burst, adherence, aging, integrins, polymorphonuclear cells, 53
- RNA, cholecystokinin, brain, intestine, gene, mRNA, injury, chemotherapy, 219
- Spawning salmon, superoxide radicals, lipid peroxidation, fluidity, proteolysis, 137
- Stress, aging, neurohumoral regulation, age pathology, 93
- Superoxide radicals, lipid peroxidation, fluidity, proteolysis, spawning salmon, 137
- Surface antigen, TNF- α , macrophage, phagocyte, aging, 207
- Survival, mortality analyses, gompertz function, weibull function, disease, failure, longitudinal analysis, 1
- SV40 large T antigen, in vitro aging, human diploid fibroblast, immortalization, chromosomal loss, 149
- TNF- α , macrophage, phagocyte, surface antigen, aging, 207
- Weibull function, mortality analyses, gompertz function, disease, failure, survival, longitudinal analysis, 1
